JOURNÉE DE FORMATION

DE LA DÉTECTION DES PHOTOGRAPHIES MANIPULÉES AUX
DOCUMENTS FALSIFIÉS OU CONTREFAITS

CNIT, LA DÉFENSE, 25 SEPTEMBRE 2018

Roger Cozien

- Founder of eXo makina
- Ph.D and Engineer in Computer Science and Physics
- Forensic Expert, Appealallate Court of Paris

*Material : computer files
encoding images*

TUNGSTENE Software

- > Expose digitally altered photographs
 - > Reveal the altered photographic message
 - > Deal with the weak signals inside the photographic and video files
 - > Find what these weak signals might tell us on both the image file AND the situation: the physical scene as it was shot
-
- **Extract , amplify and expose weak information**
 - **Alteration and forgery are weak signal**

Rationale

TO ASSESS

Still digital images
or videos as
computer files

> Look for
**anomalies and
forgeries**

Still digital images or videos
as tracks of a physical scene

> Extract information
**about the physical objects
and processes**

Rationale

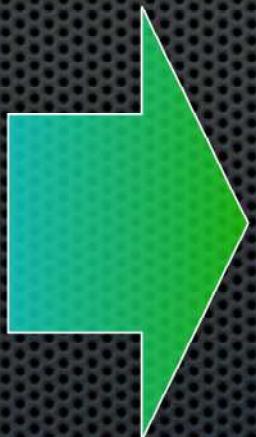

TO ASSESS

Still digital images
or videos as
computer files

> Look for
**anomalies and
forgeries**

Still digital images or videos
as tracks of a physical scene

> Extract information
**about the physical objects
and processes**

Scientific Work

- Strictly scientific conception
- Fundamentally a mathematical and computer approach
- Comprehension of the digital photography process
- Scientifically supported results

Mathematical Tools

❖ Multispectral Analysis

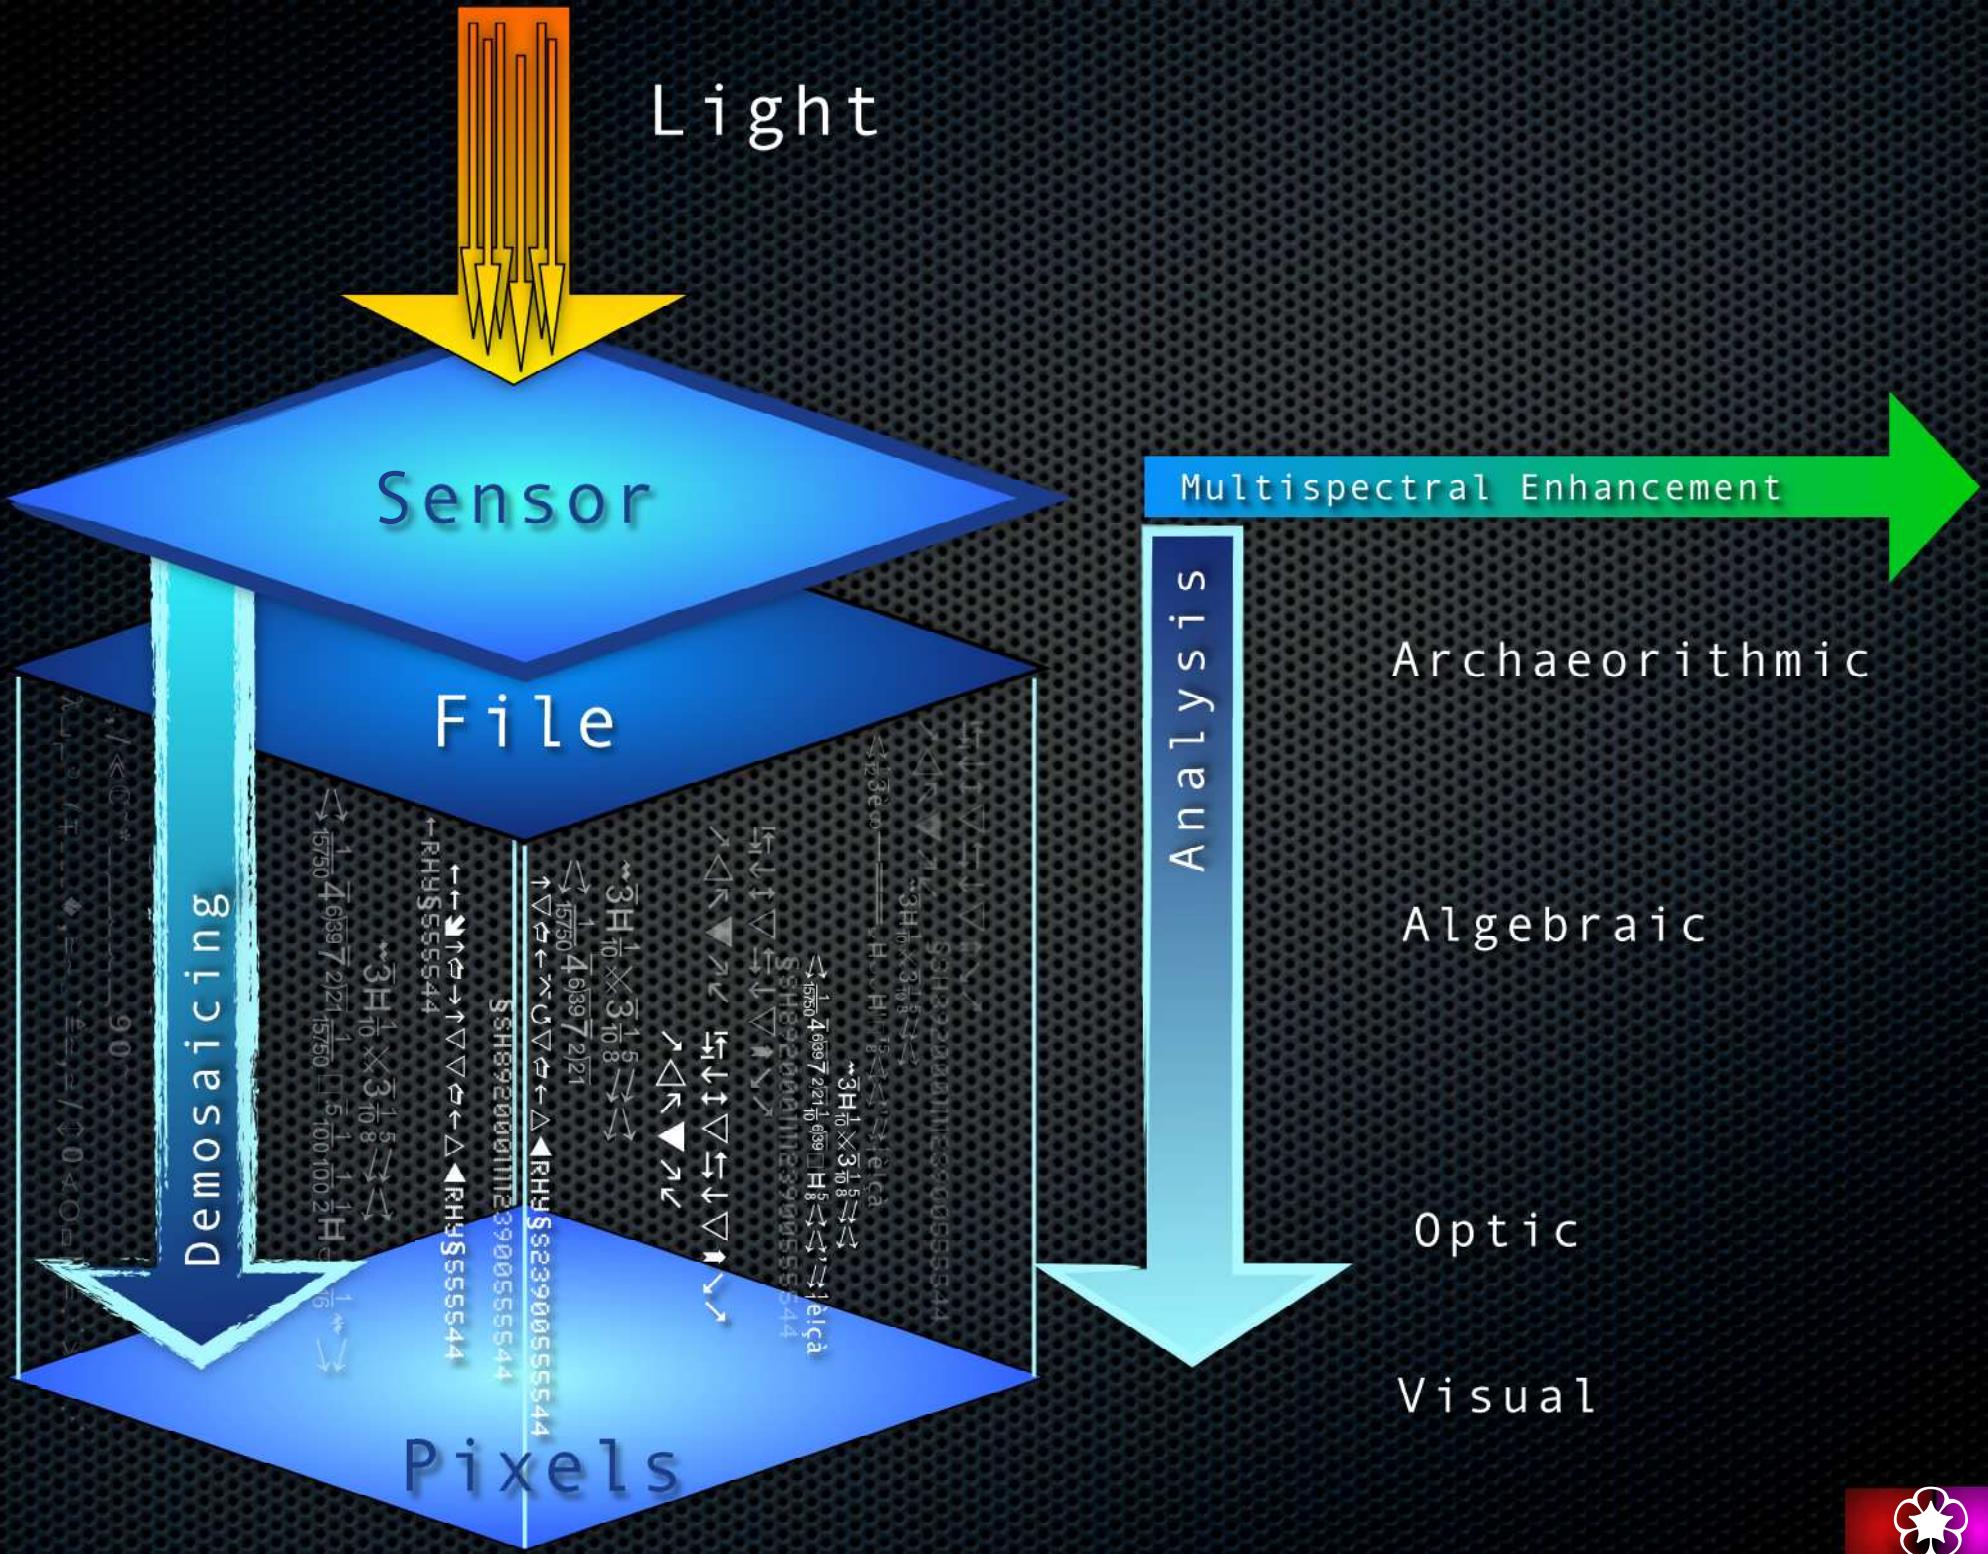

- Extract data and **information** on the physical properties of any physical object based on the information carried by the light.
- 2 types of light:
 - Reflected by the physical objects,
 - Emitted light.

❖ Algebraic Topology

- We make a projection of the data included inside the image file in specific 3D spaces where the geometrical and algebraic relations (between these data) let us

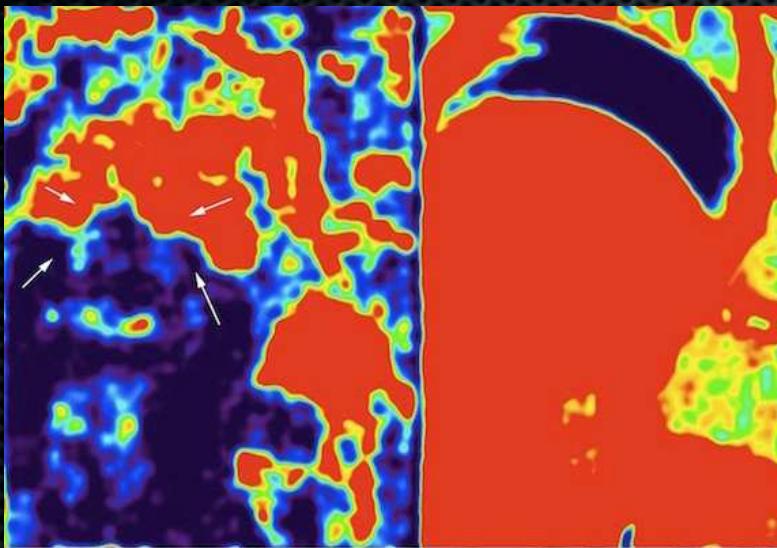

Light

TUNGSTEN Methodology:

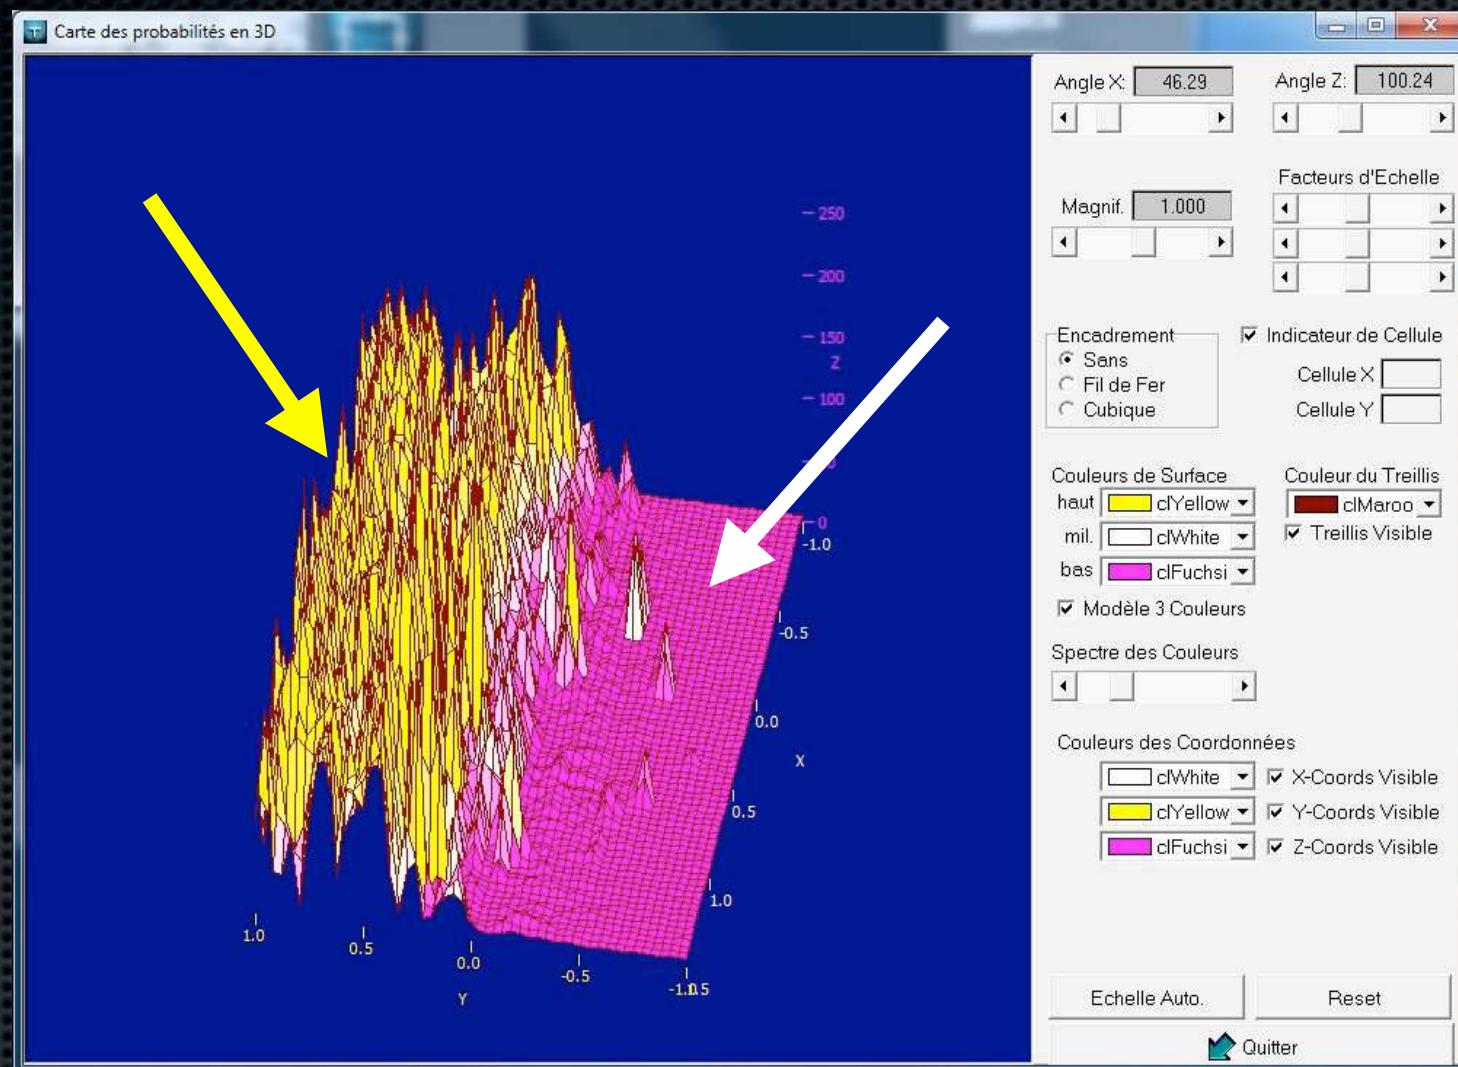

- Is the file an original?
 - Has the file been digitally altered?
 - Where? (Surface or structure)
 - Separate Artifact from singularity from alteration
-
- How was the tampering done?
 - Why was the tampering done?
-

Scientific Work

- TUNGSTEN is not to be used to pass judgement on a situation or on an author of the forgery
- TUNGSTEN must only be used to retrieve a large amount of information and technical details from the photographic file
- User's duty: give the proper interpretation from all the information and details

Government Services

- Removing or Limiting doubts and risks, communicating effectively

Multispectral Analysis

- Two main types of images
 - Aerial and/or satellite images
 - Missile launch images

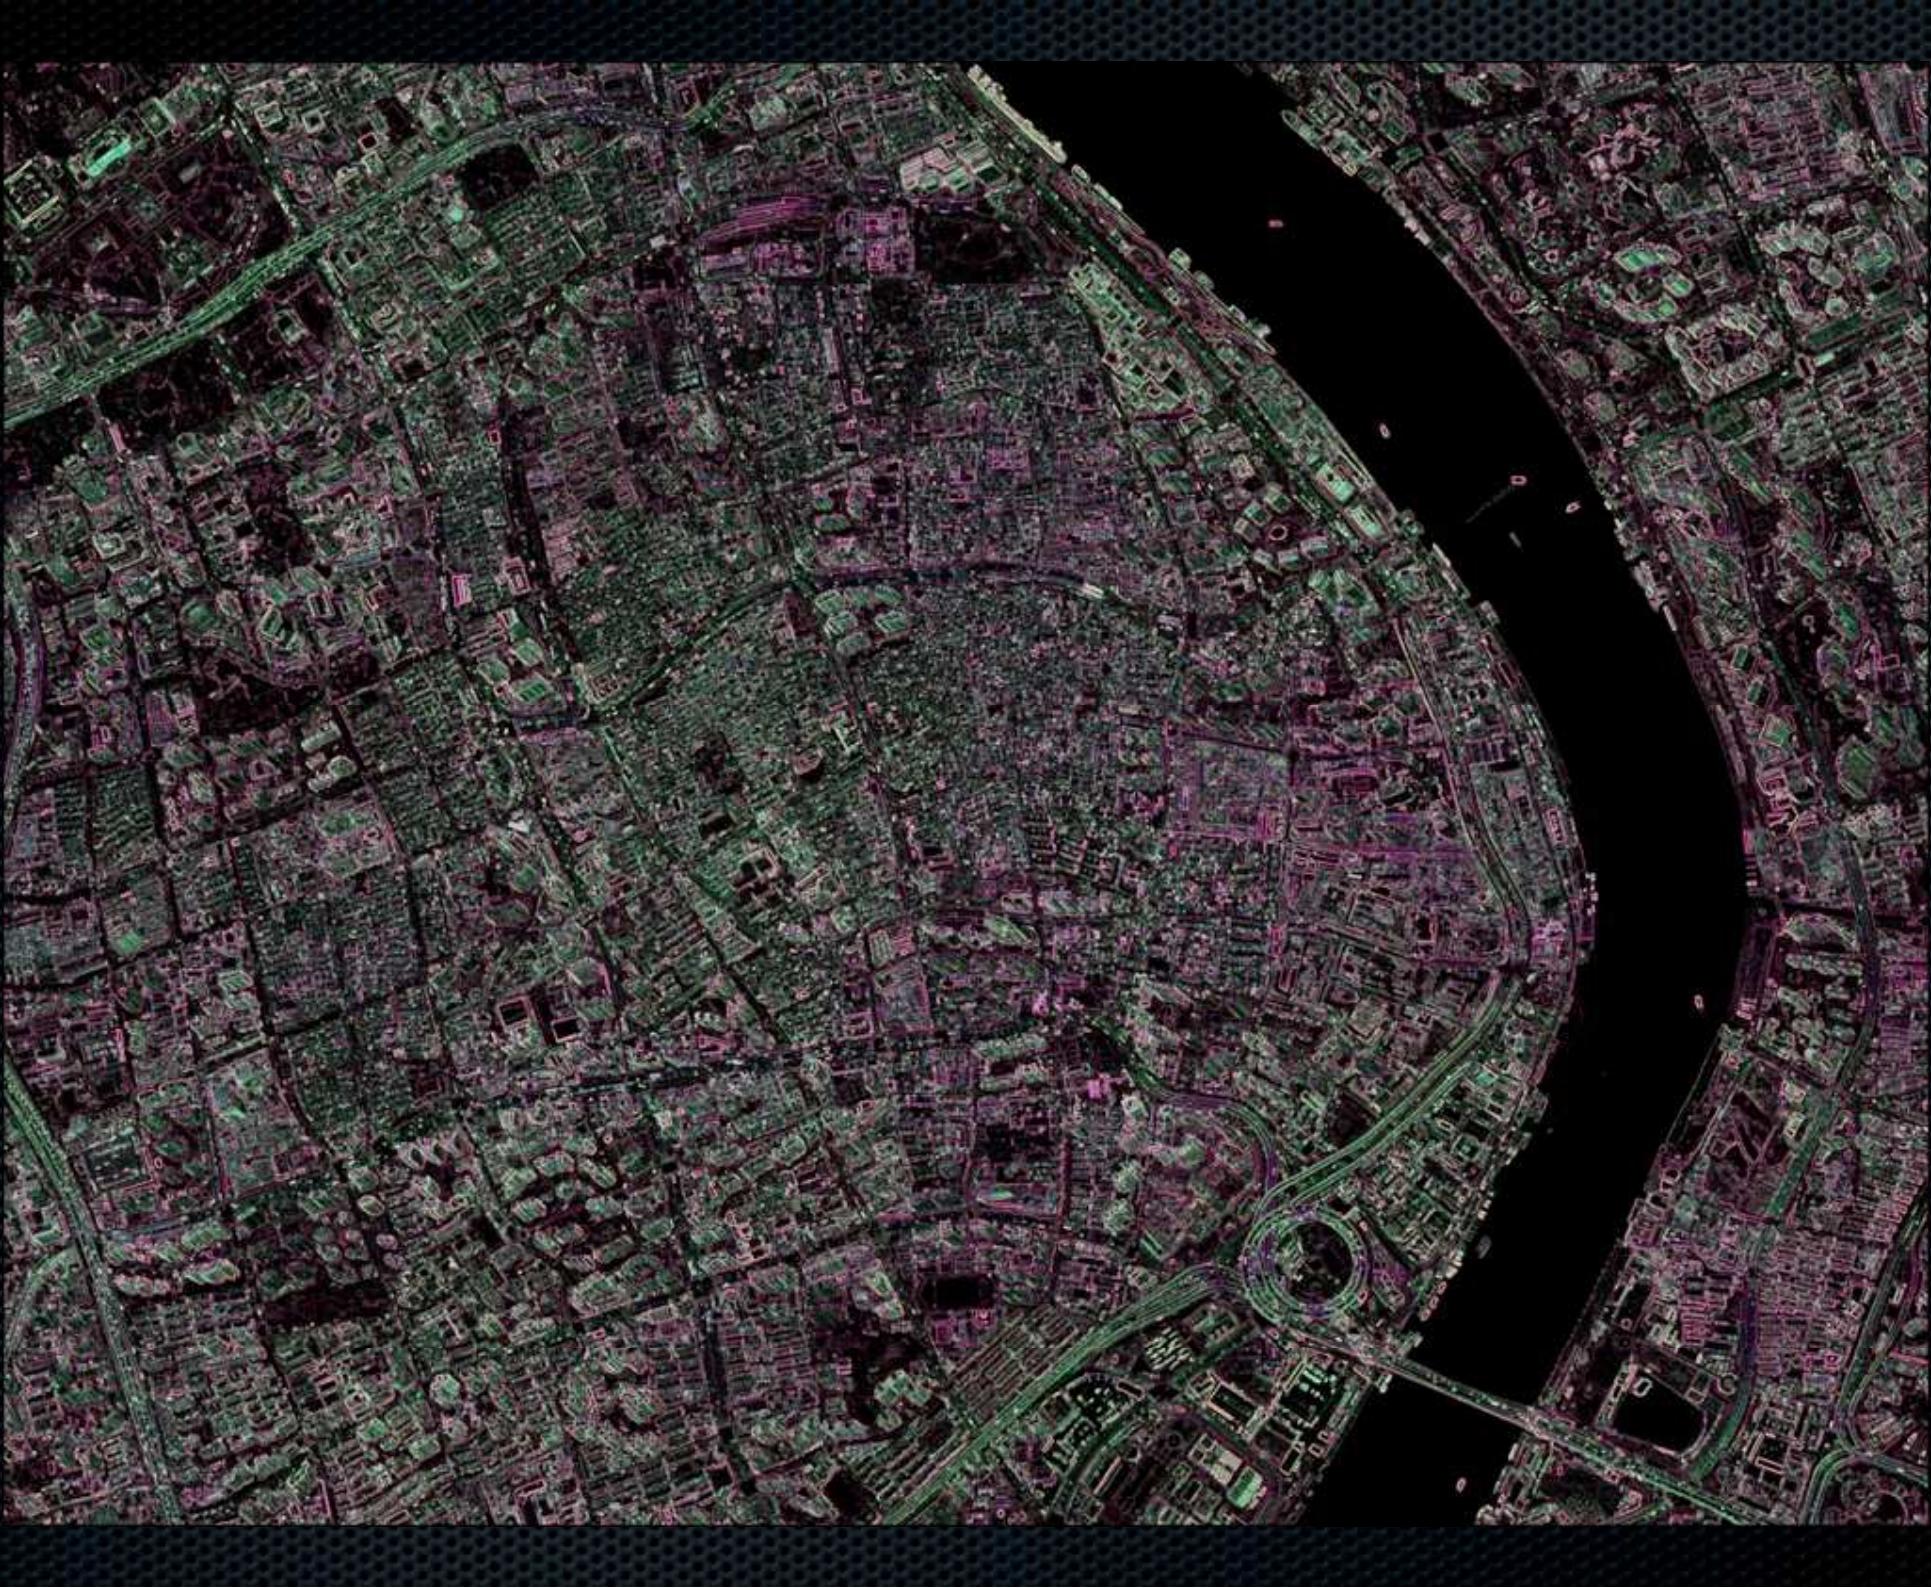

Shanghai

An aerial grayscale photograph of a city, likely Shanghai, showing a dense network of streets and buildings. A prominent, light-colored diagonal band runs from the top right towards the bottom left, possibly representing a bridge or a major road.

Shanghai

A high-resolution satellite image of Shanghai, China, showing the city's dense urban sprawl and the Yangtze River flowing through it. The city is characterized by a grid-like street pattern and a mix of green spaces and built-up areas. The river is visible on the right side of the image.

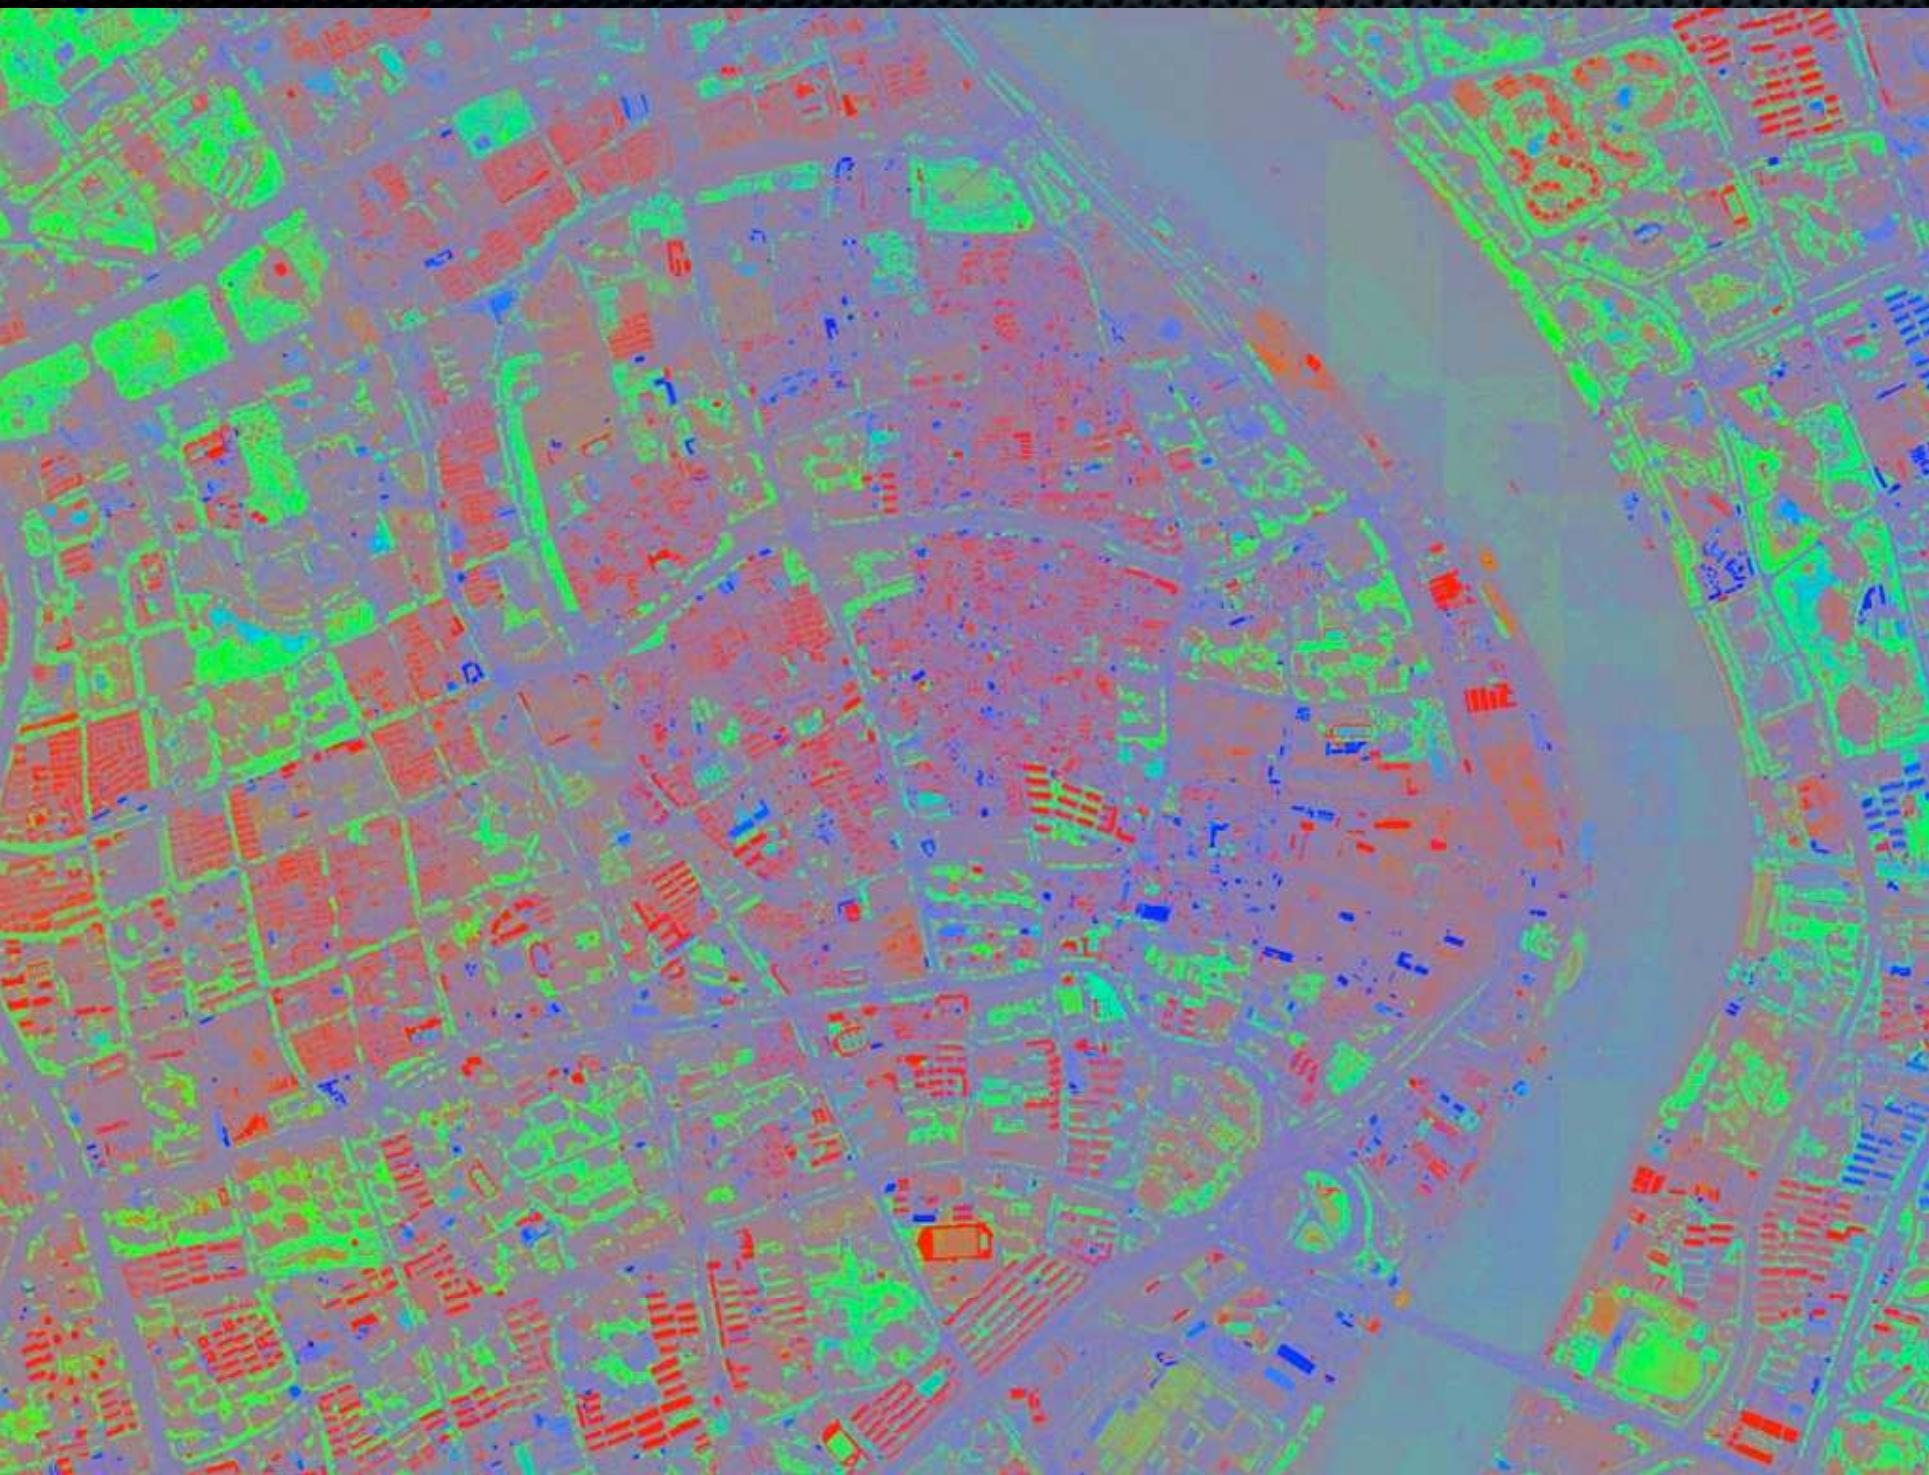

Shanghai

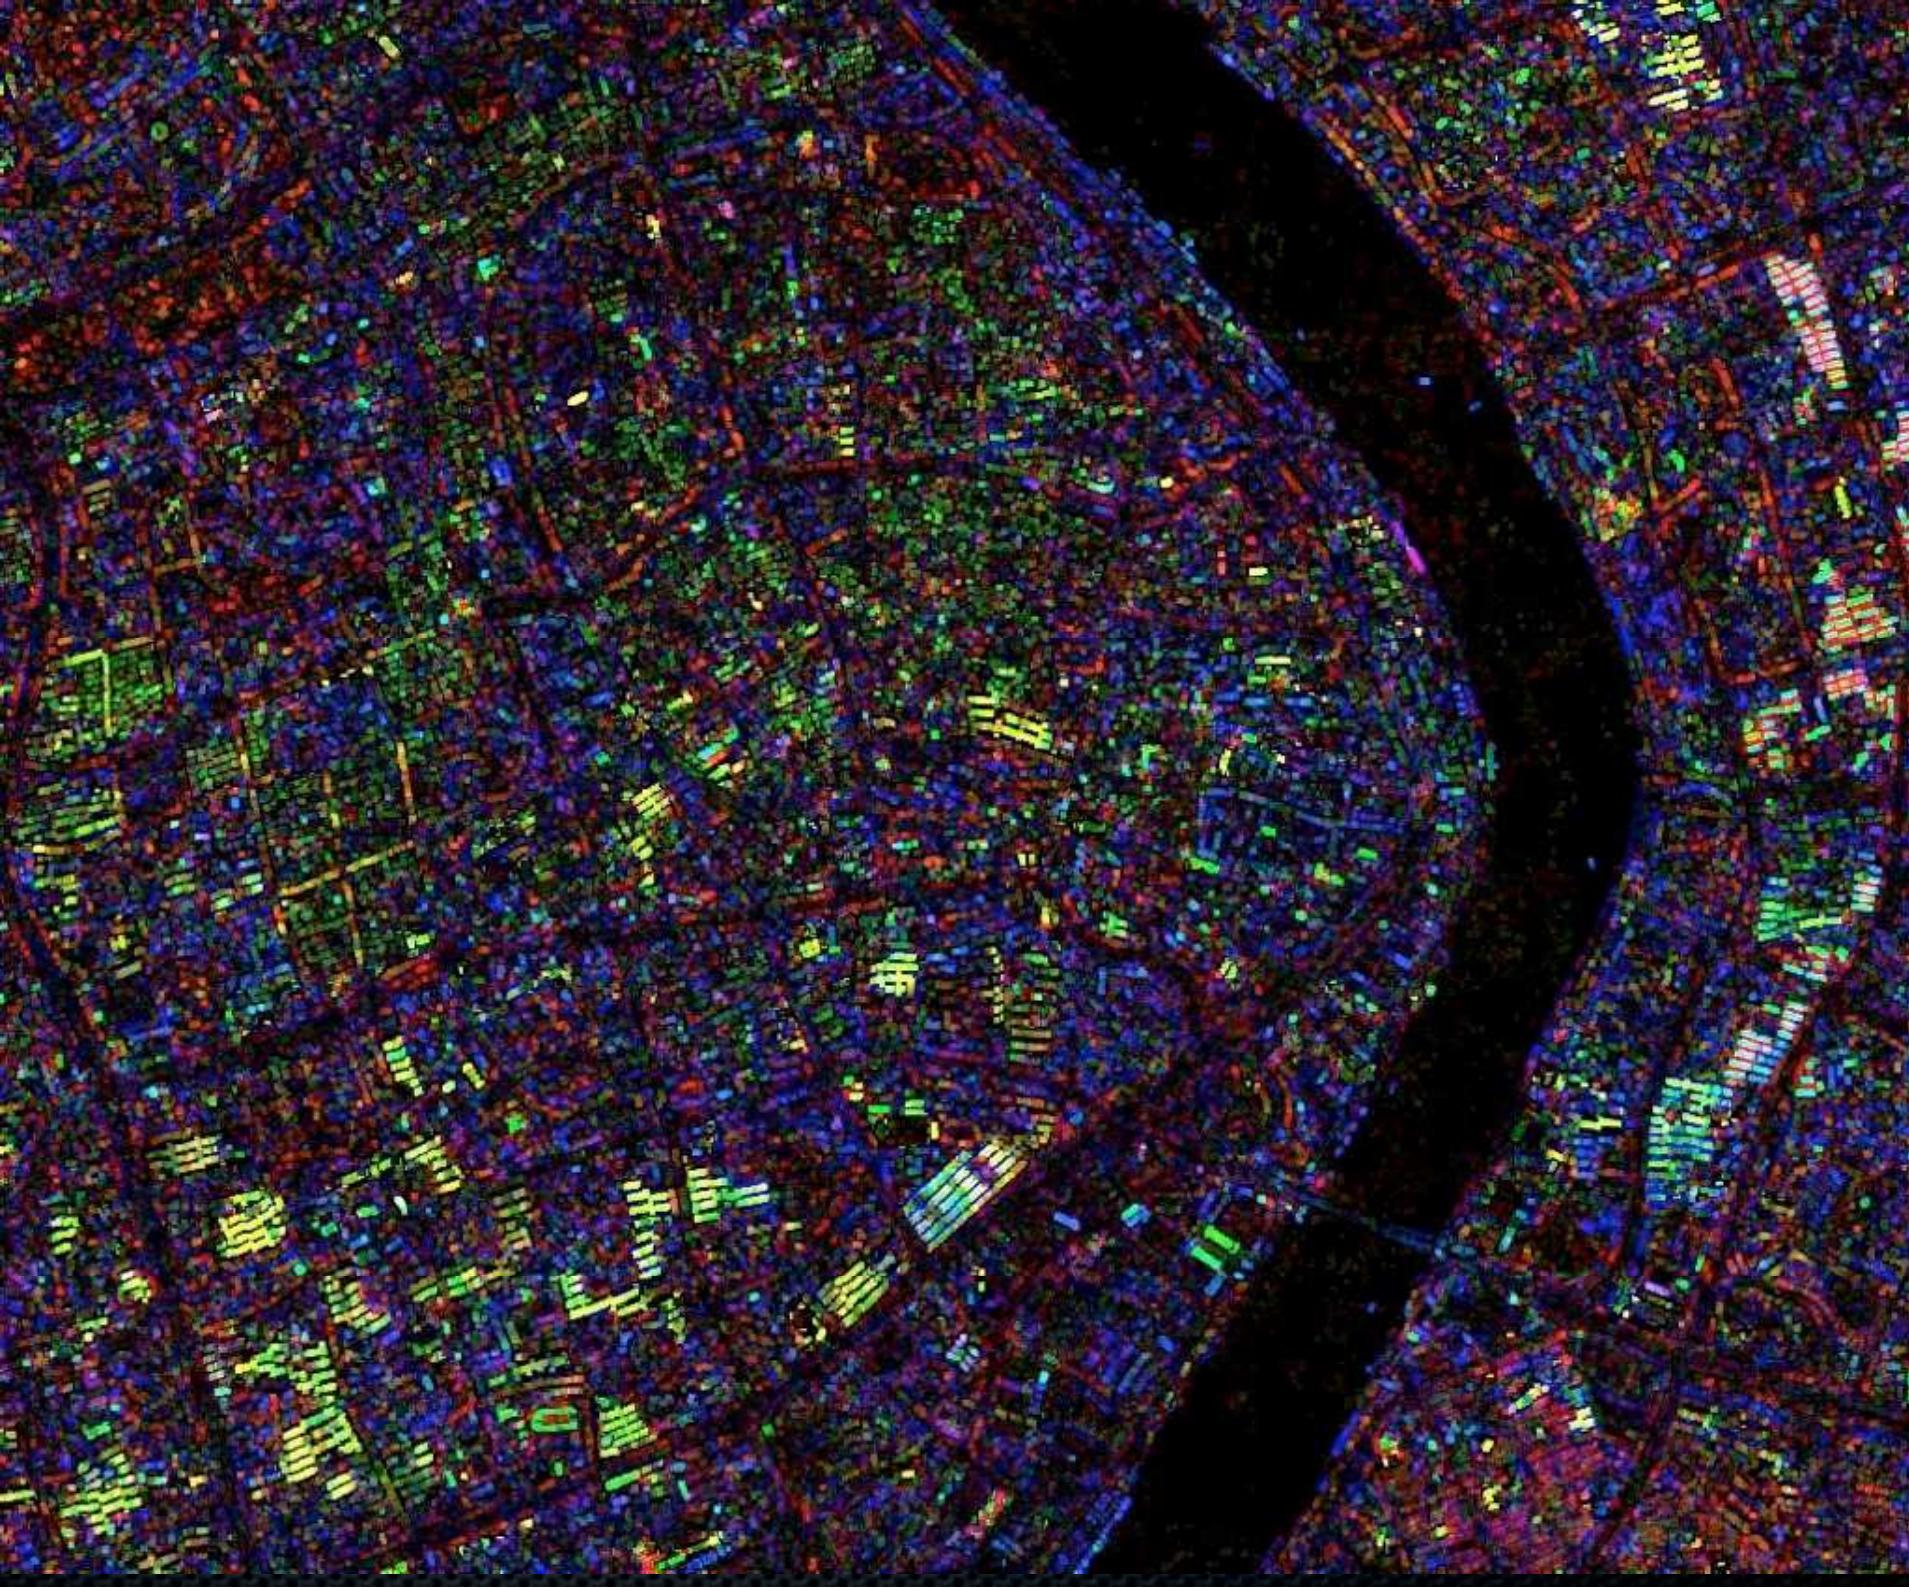

Shanghai

Shanghai

Shanghai

Shanghai

A high-resolution aerial photograph of Shanghai, China, showing a dense urban area with a grid-like street pattern. A prominent river or canal cuts through the city, with several bridges crossing it. The buildings are mostly low-rise residential structures, though some taller apartment complexes are visible. The surrounding land appears to be a mix of urban development and green spaces.

« Pas de démocratie sans conférence populaire »

Date : 10. 12. 2006

Correspondant à : 10. 12. 1375

N° 1917 68 P

Service de la sécurité extérieure

Frère / Président du Fonds libyen des investissements africains

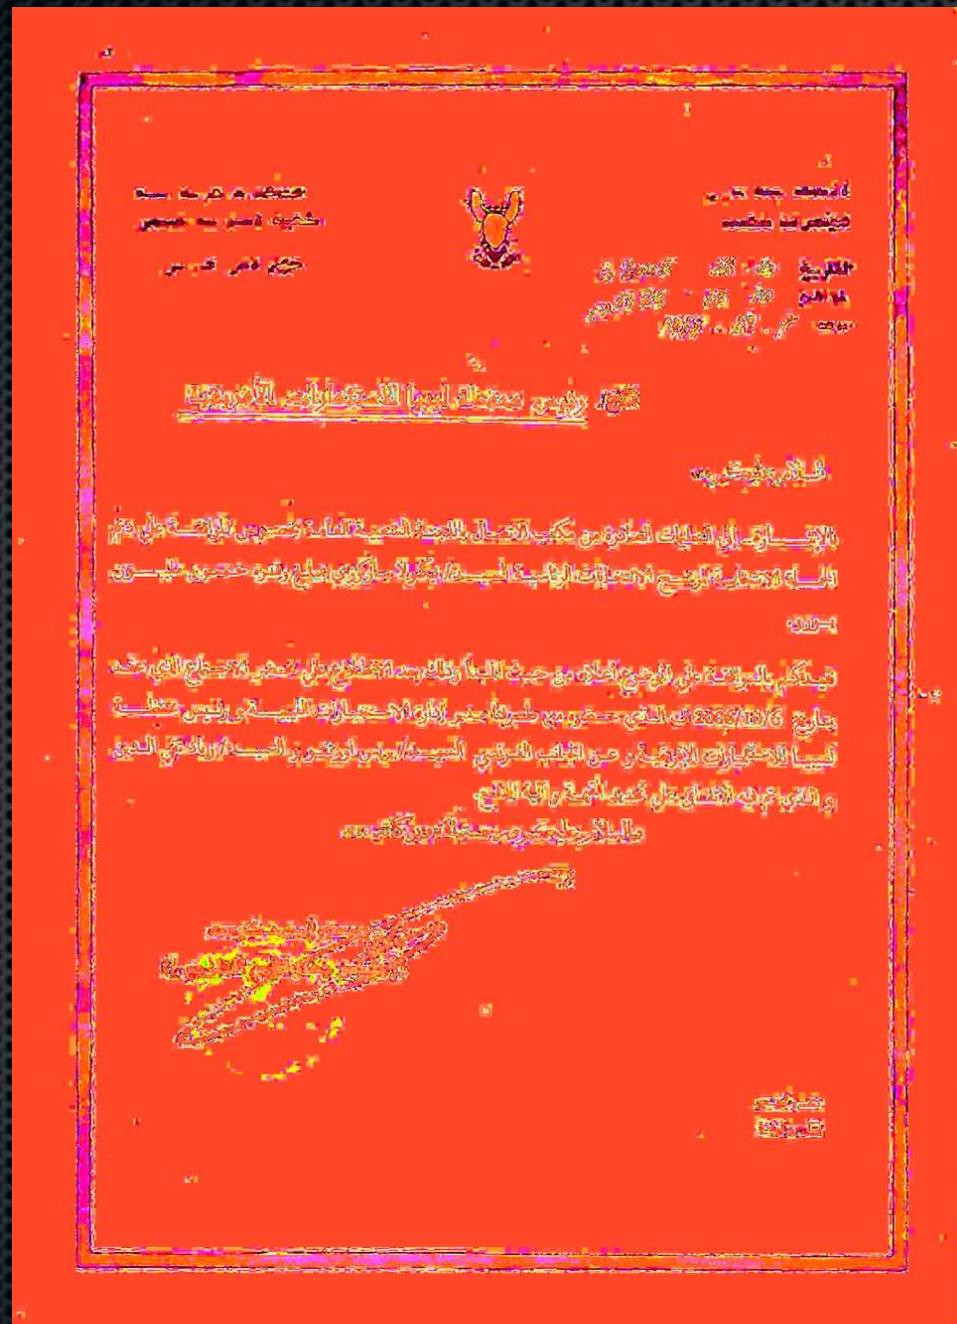

Que la paix soit sur vous...

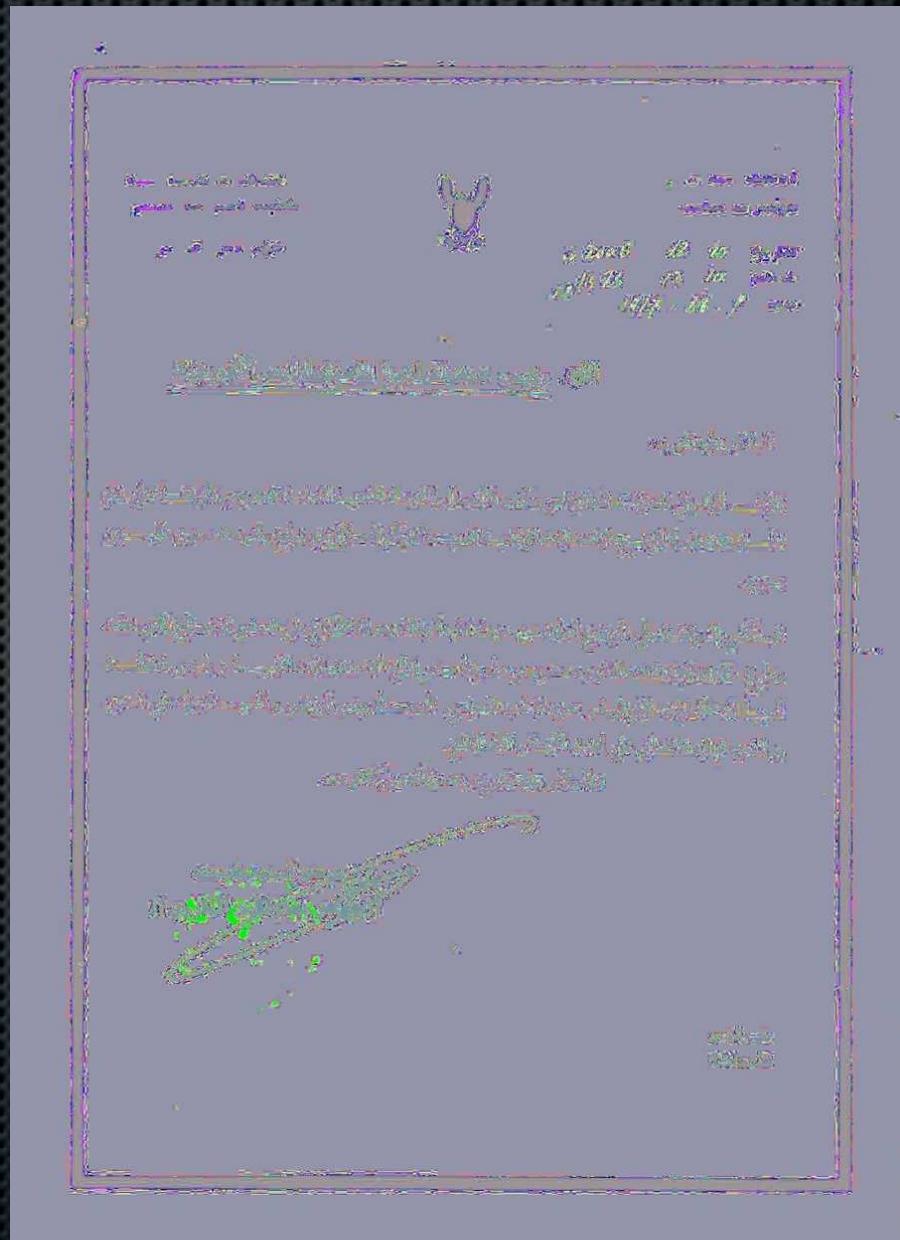

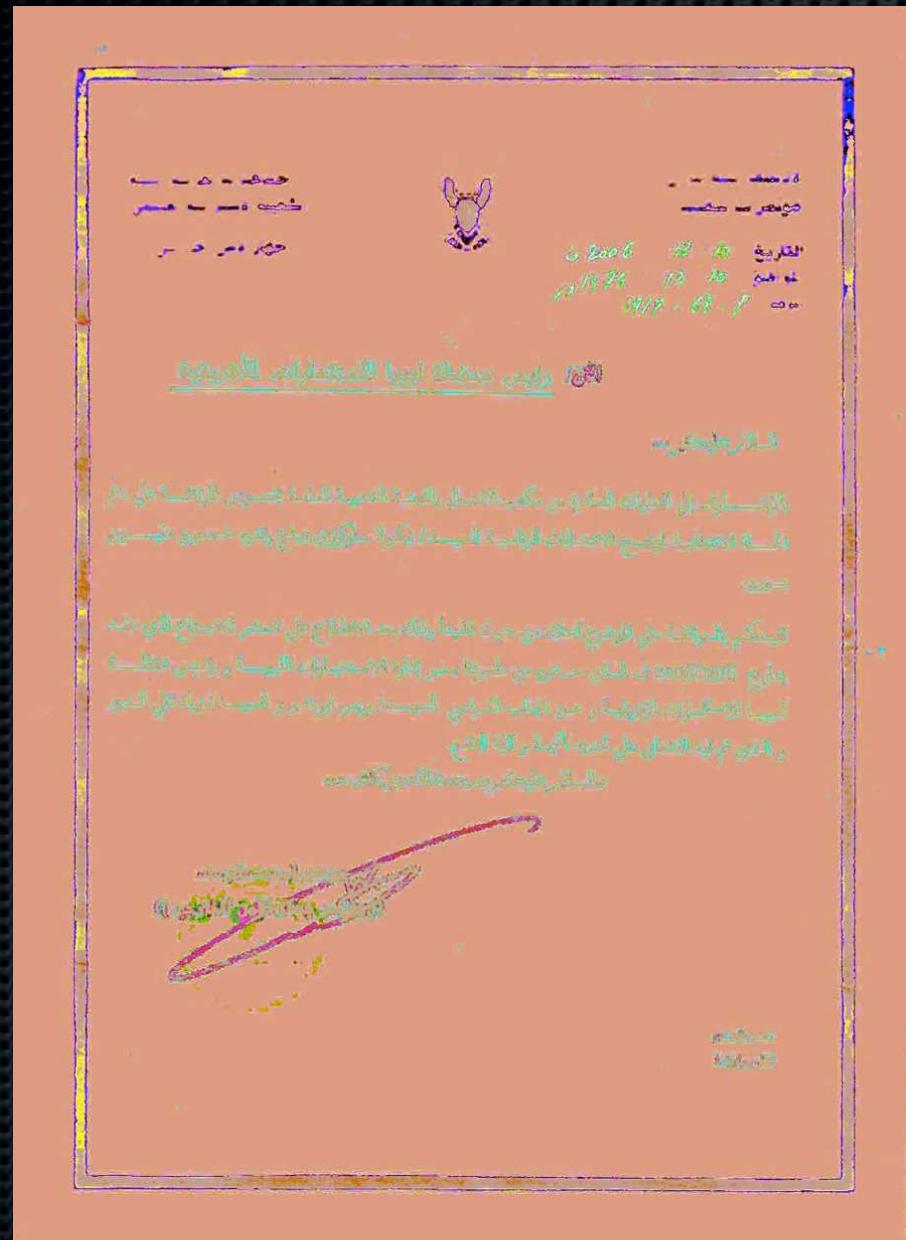

En référence aux instructions émises par le bureau de liaison du comité populaire général concernant l'approbation d'appuyer la campagne électorale du candidat aux élections présidentielles, Monsieur /Nicolas Sarkozy, pour un montant d'une valeur de cinquante millions d'euros.

Nous vous confirmons l'accord de principe quant au sujet cité ci-dessus, et ce après avoir pris connaissance du procès-verbal de la réunion tenue le 6. 10. 2006, à laquelle ont participé de notre côté le directeur des services de renseignements libyens, et le président du Fonds libyen des investissements africains, et du côté français, Monsieur /Brice Hortefeux, et Monsieur /Ziad Takieddine, et au cours de laquelle un accord a été conclu pour déterminer le montant et le mode de paiement.

Que la paix soit sur vous et la miséricorde de Dieu et ses bénédictions...

Moussa Imuhamed Koussa
Chef du service de la sécurité extérieure
